About the Report

This report is the first edition of the Social Responsibility & Environmental, Social and Governance Report of China International Marine Containers (Group) Co., Ltd. (the "Company" and its subsidiaries, collectively referred to as the "Group") organically combining the Social Responsibility Report of the Company issued in 2008, and the Environmental, Social and Governance Report of the Company, issued in 2017. This report objectively reflects the efforts and achievements made by the Group in terms of sustainable development of the society and itself through active fulfillment of its social responsibilities while pursuing its own development. The board of directors of the Company expressly confirms its responsibility for authenticity of the report, takes full responsibility for the Group's environmental, social and governance strategies and reporting as it has reviewed and approved the report.

Information Disclosure and Investor Relations Management

Information Disclosure

In accordance with the relevant laws and regulations such as the Company Law, the Securities Law, the Articles of Association, the Guidelines for Information Disclosure of Listed Companies, Rules Governing the Listing of Securities on the Shenzhen Stock Exchange and the Rules Governing the Listing of Securities on the Hong Kong Stock Exchange, the Group has established the Information Disclosure Management System. The Office of the Secretariat of the Board of the Company is responsible for information disclosure. We have formulated the Information Disclosure Management System, according to which we timely, accurately, completely and fairly disclose information and manage insiders registered for confidentiality.

In 2017, the Company received no feedback from investors on information disclosure. In the future, we will continue to improve the communication channels with investors, and actively respond to the concerns of A-Share and H-Share investors on information disclosure, so as to further enhance the transparency of the Company's affairs, and timely and accurately disclose information.

Responsible Marketing Complaint Handling

On the basis of safe and reliable products and the handling of customers' opinions, we provide acceptable services. In particular, in case customers are involved in the design of products and services, we will fully listen to their needs and fulfill them.

In addition, based on the Guidelines for Responsible Marketing Activities of the Group, we will not deceive customers with false or misleading information. We will collect customers' feedback and suggestions actively through various channels, such as customer hotlines, customer service centers, etc. Professional personnel will be assigned to handle customers' complaints.

Customer Privacy Protection

Since its establishment, the Group, based on its different business characteristics, has established and improved its customer information management system and technical measures to protect customer privacy. The Group has established clear guidelines for customer information collection, storage, use, processing and destruction. To ensure customer information safety, we provide employees with access to customer information only when necessary. During the reporting period, the Group has not received any complaints from external parties and regulatory authorities regarding customer information leakage or loss.

Win-win Cooperation

Case Study CIMC Tianda Building a Safety Experience Hall

In 2017, each of CIMC's production bases launched the safety training experience halls to enhance the effectiveness of safety training through specialized and practical training. The CIMC Tianda Fire and Rescue Team, a fire-fighting experience hall is installed with various facilities and equipment to simulate the safety accidents and emergency capabilities of employees.

Production Safety Inspection

The Group implements annual safety inspection and special safety inspection in addition to the daily, 3-level safety inspection conducted at all levels and categories to identify and rectify the potential safety hazards.

In 2017, the Group organized internal evaluation of HSE standardization and maintenance of 12 enterprises and evaluation of HSE standardization and maintenance certification of 3 enterprises. In the meantime, cross-evaluation was conducted among the Container Segment, the Vehicle Segment, the Group organized flight evaluation of 116 enterprises; the Energy and Chemical Segment, the Group initiated internal cross-evaluation among enterprises at safety and ecological risk, and flight evaluation of Asia, the Ocean Engineering Segment, the Group has carried flight evaluation at the beginning of 2016. Due to the efficient and successful internal evaluation and flight evaluation by the Group, the safety management of enterprises has been elevated.

Emergency Response Treatment for Safety Accidents

The Group developed itself emergency response management system and emergency response plan for safety accidents, and conducted emergency response drills for the building fire, earthquake and chemical leakage, etc. Through the emergency response drill, employees' emergency response capability for safety accidents, and fire fighting skills have been improved.

In 2017, Qingda Reefer, a subsidiary of the Group, participated in the Philippine Red Cross Blood Donation Campaign held by the local Red Cross Society. Besides participating in the blood donation campaign, employees also actively participated in the public welfare activities organized by the Philippine Red Cross, including providing free medical consultation, distributing free medicines, and conducting free health checks. The company was awarded the Blood Donation Partnership Award, which received positive feedback from the public.

Outlook – Risks and Challenges

We weigh up the situation and think carefully about every step in the future. By controlling risks and grasping opportunities, we formulate a detailed plan to integrate the fulfilment of social responsibilities with corporate and social sustainable development.

Risks and Challenges

The global political and economic scenario remain ha y in the early stage
